What's new in BOXIT Levelpack 2:

The next levelpack: after Infestator, this one: Refined. Hardcore, aggressive speed build as an alternative to the Infestator. Map type: Battleground Visible: yes Skills and Abilities

The first important thing about Tuxedo is the totally solid damage output provided by Icehelmets. They do take up a lot of your speed, but they do provide you with massive damage output. Secondly, Tuxedo includes two character traits: Frozen Flash and Phase Strike. Frozen Flash allows Tuxedo to freeze enemies and activate his special effect. Making a Phase Strike (1-7) does the same thing, plus you get a slow.

Skills

- Skill Frostbound Armour - Activates a Mochi Helmet, activating Frozen Flash + Tempo Strike**
- Activating this helmet gives you a shield and a slow.**
- Proximity Attack - [Awarded when Kariya pulls his next attack]**
- Attacks a random enemy (all skill use a cooldown regardless of position (but if hit at long distance, use a separate cooldown for "dakuten"))**

Level-up Ability Main ability (per character) At level-up you gain:

- Icehelmets - 1 Increased movement speed - 3**

1st level: Additionally freezes target enemy

2nd level: Additional effect - changes the 1st to 2nd skill use to Phase Strike or Baleful Counter + Will to Cold

3rd level: Additional effect - Icecrystals + Cold Protection to Barrier (can also be stacked in 4 times to Wall of Ice)

4th level: Max. number of SP called in Attack changed from 2 to 3. Passive resistance is 0%. Action Effect Phase Strike (rarity - increased)

Movement Speed + 15% cooldown 1 sec Put on cooldown 1 min

Cooldown 2 min Wards the affected enemy for the duration of the cooldown. Countdown: 10% (10 to 1) That's 10% of the cooldown. If you already used the last 10%, the cooldown will start from 30% of its original cooldown. Damage is dealt to self as well. Cooldown is broken down into a duration of 5%. So, if you Cooldown 4 sec, the first segment will do 25% of the damage, the second
